

**Ref cod:**

**Manuscript title:**

*Title*

1. Does the manuscript's title indicate the novelty of the study and attract the readers' attention?  
Yes to some extent No
2. Is the manuscript's title a good indicator of manuscript content?  
Yes to some extent No

Comments and critical judgment:

*Abstract*

1. Does it provide the context or background of the study?  
Yes to some extent No
2. Does it state the purpose of the study?  
Yes to some extent No
3. Does it state the main procedures of the study?  
Yes to some extent No
4. Does it state the main findings?  
Yes to some extent No
5. Does it state the principle conclusions of the study?  
Yes to some extent No
6. Are adequate and appropriate key words selected from the Medical Subject Headings (Mesh)?  
Yes to some extent No

Comments and critical judgment:

*Introduction*

1. Are Objective(s) and literature review of the topic clearly stated in "introduction?"  
Yes to some extent No
2. Has introduction proper length?  
Yes to some extent No
3. Is introduction relevant?  
Yes to some extent No

Comments and critical judgment:

### *Methods and materials*

1. Is the study design appropriate for answering the research question?  
Yes to some extent No
2. Are proper methods and materials selected?  
Yes to some extent No
3. Are the method details presented clearly?  
Yes to some extent No
4. Are the data gathering tools valid and reliable?  
Yes to some extent No
5. Are statistical analysis and tests correct and obvious?  
Yes to some extent No
6. Are all the Ethical issues considered?  
Yes to some extent No

Comments and critical judgment:

### *Result*

1. Are results "clear", "Adequate" and "comprehensive"?  
Yes to some extent No

2. Are the results solely derived from the findings of this article?  
Yes to some extent No
3. Are tables and illustrations helpful for better and faster understanding of the results?  
Yes to some extent No
4. Are all existing tables and illustrations cited in the text and do they confirm those data?  
Yes to some extent No
5. Has the writer avoided the repetition of charts and illustrations in the text?  
Yes to some extent No

Comments and critical judgment:

### *Discussion*

1. Are the findings explained completely and logically in "discussion"?  
Yes to some extentNo
2. Are the advantages and limitations of study mentioned?  
Yes to some extentNo
3. Are the similarities and differences with other relevant studies mentioned?  
 a. Yesto some extentNo
4. Enough similar reference and studies have been mentioned?  
 a. Yesto some extentNo

Comments and critical judgment:

### *Conclusion*

1. Is the Conclusion clear and concise?Yes to some extentNo
2. Are conclusions related to the aim of the study?Yesto some extent No
3. Are conclusions based on the study's findings?Yes to some extentNo

Comments and critical judgment:

### *References*

1. Are the references adequate for Original Articles?  
Yes to some extent No
2. Are new and valid references used for this study?  
Yes to some extent No
3. All references have been considered?  
Yes to some extent No

Comments and critical judgment:

### *Language*

1. The quality of Scientific English language is Satisfactory?

Yes to some extent No

Comments and critical judgment:

**What is your final judgment about the publication of this manuscript?**

- Acceptable
- Acceptwith minor revision
- Acceptwith major revision
- Reject

Comments and critical judgment:
